MODERNISATION FUND EIB CONFIRMATION OF PRIORITY INVESTMENT Subsequent Disbursement Request

ref. MF 2022-2 PL 0-001

Beneficiary Member State: Poland

Investment Proposal: Smart energy infrastructure

1. Background

The Modernisation Fund was set up pursuant to Article 10d of Directive 2003/87/EC of the European Parliament and of the Council of 13 October 2003 establishing a system for greenhouse gas emission allowance trading within the Union and amending Council Directive 96/61/EC (the "ETS Directive").

The legal basis for the operation of the Modernisation Fund is set out in the Commission Implementing Regulation (EU) 2020/1001 of 9 July 2020 laying down detailed rules for the application of Directive 2003/87/EC of the European Parliament and of the Council as regards the operation of the Modernisation Fund supporting investments to modernise the energy systems and to improve energy efficiency of certain Member States (the "Implementing Regulation").

In accordance with Article 10d(6) of the ETS Directive, the European Investment Bank (the "EIB") is to confirm whether a proposed investment falls into a priority area. The EIB may confirm the proposal as a priority investment if the conditions specified in Article 6(7) of the Implementing Regulation are met.

After the European Commission has decided on the first disbursement to the scheme, any subsequent disbursement shall require a separate proposal from the beneficiary Member State specifying the amount to be disbursed and containing the updated information about the scheme, as appropriate.

In accordance with Article 6(8) where a proposal concerns a subsequent disbursement for a scheme confirmed by the EIB in accordance with paragraph 9 prior to the first disbursement, the assessment of the proposal by the EIB shall be limited to verification of the available funds in accordance with point (b) of paragraph 7, provided that there have been no changes to the scheme.

2. Investment proposal

Pursuant to Article 4(2) (second sentence) of the Implementing Regulation, on 05/08/2022 Poland (the "beneficiary Member State") submitted to the EIB an investment proposal concerning a subsequent disbursement from the Modernisation Fund for the Smart energy infrastructure (Modernisation Fund reference number MF 2022-2 PL 0-001).

The investment scheme "Smart energy infrastructure" was confirmed as a priority investment proposal by the EIB on 07/06/2021 (Modernisation Fund reference number MF 2021-1 PL 0-003).

The main objective of the investment is to develop an Advanced Metering Infrastructure by rolling-out smart electricity meters to end users as well as the necessary infrastructure.

The scheme aims at assisting the active participation of customers to the electricity market. Smart metering systems are expected to allow customers to have near real-time access to their consumption data, to modulate their energy consumption and potentially to offer their flexibility to the power system.

Raising awareness of consumers and encouraging their active participation in the energy market through smart meters and dynamic tariffs is one of the objectives and targets of the National Energy and Climate Plan (NECP) for Poland. Smart grids, and in particular smart metering systems are included in the measures of the NECP aiming at utilising the energy efficiency potential of the electricity infrastructure.

The European Commission decided on the first disbursement of the revenues of the Modernisation Fund under Directive 2003/87/EC to the scheme on 28 July 2021 (C(2021) 5802).

The EIB has disbursed an amount of EUR 44 000 000 of the revenues of the Modernisation Fund.

The beneficiary Member State has requested funding of EUR 178 000 000 for a subsequent disbursement.

The beneficiary Member State has indicated an expected Modernisation Fund funding for the investment proposal of EUR 222 000 000.

3. Compliance with the conditions for priority investment

- a) The beneficiary Member State has confirmed that there have been no changes to the scheme.
- b) The beneficiary Member State has sufficient funds available for the requested disbursement according to the statement of the available funds referred to in Article 5(1) of the Implementing Regulation and after deduction of any amounts to be disbursed for investments already confirmed in accordance with Article 6(9) of the Implementing Regulation.

4. Conclusions

The EIB has assessed the subsequent disbursement proposal based on the information submitted by the beneficiary Member State in accordance with Article 4(2) (second sentence) of the Implementing Regulation.

The EIB confirms that sufficient funds are available for the disbursement requested.

The beneficiary Member State has declared that there are no changes to the evidence of State aid compliance for the Scheme.

In view of the above, and in reliance on the information and evidence provided and the confirmations given by the beneficiary Member State as described at paragraph 3 above, the EIB confirms the subsequent disbursement of EUR 178 000 000 for the priority scheme "Smart energy infrastructure".

This confirmation is without prejudice to the requirement for a disbursement decision to be made pursuant to Article 10d(3) of the ETS Directive.

European Investment Bank Luxembourg, 10th October 2022
